Table of Contents Volume 183, 1991

Number 1

E.R. Bejarano, J. Avalos, E.D. Lipson, E. Cerdá-Olmedo: Photoinduced accumulation of carotene in *Phycomyces* 1

M. Blom-Zandstra, H.T.M. Koot, J. van Hattum, A.C. Borstlap: Interactions of uptake of malate and nitrate into isolated vacuoles from lettuce leaves 10

F. Aleith, G. Richter: Gene expression during induction of somatic embryogenesis in carrot cell suspensions 17

W. van Uden, N. Pras, S. Batterman, J.F. Visser, T.M. Malingré: The accumulation and isolation of coniferin from a high-producing cell suspension of *Linum flavum* L. 25

R. Wendler, R. Veith, J. Dancer, M. Stitt, E. Komor: Sucrose storage in cell suspension cultures of *Saccharum* sp. (sugarcane) is regulated by a cycle of synthesis and degradation 31

M. Stitt, A. von Schaewen, L. Willmitzer: "Sink" regulation of photosynthetic metabolism in transgenic tobacco plants expressing yeast invertase in their cell wall involves a decrease of the Calvincycle enzymes and an increase of glycolytic enzymes 40

R. Swarup, M.J. Bennett, J.V. Cullimore: Expression of glutamine-synthetase genes in cotyledons of germinating *Phaseolus vulgaris* L. 51

H. Nonami, E.-D. Schulze, H. Ziegler: Mechanisms of stomatal movement in response to air humidity, irradiance and xylem water potential 57

J. Voigt, D. Mergenhagen, I. Wachholz, E. Manshard, M. Mix: Cell-wall abnormalities of a *Chlamydomonas reinhardtii* mutant strain under suboptimal growth conditions 65

A.J.E. van Bel, R. Kempers: Symplastic isolation of the sieve element-companion cell complex in the phloem of *Ricinus communis* and *Salix alba* stems 69

G. Caetano-Anollés, P.A. Joshi, P.M. Gresshoff: Spontaneous nodules induce feedback suppression of nodulation in alfalfa 77

S. Schulz, E. Oelgemöller, E.W. Weiler: Fusicoccin action in cell-suspension cultures of *Corydalis sempervirens* Pers. 83

J.J. Sauter, B. van Cleve: Biochemical, immunochemical, and ultrastructural studies of protein storage in poplar (*Populus* × *canadensis 'robusta'*) wood 92

H. Schrubar, G. Wanner, P. Westhoff: Transcriptional control of plastid gene expression in greening *Sorghum* seedlings 101

U. Kutschera, C. Siebert, Y. Masuda, A. Sievers: Effects of submergence on development and gravitropism in the coleoptile of *Oryza sativa* L. 112

K.M. Jäger, B. Bergman: Localization of a multifunctional chaperonin (GroEL protein) in nitrogen-fixing *Anabaena* PCC 7120. Presence in vegetative cells and heterocysts 120

C. Forreiter, B. van Cleve, A. Schmidt, K. Apel: Evidence for a general light-dependent negative control of NADPH-protochlorophyllide oxidoreductase in angiosperms 126

J.E. Taylor, G.A. Tucker, Y. Lasslett, C.J.S. Smith, C.M. Arnold, C.F. Watson, W. Schuch, D. Grierson, J.A. Roberts: Polygalacturonase expression during leaf abscission of normal and transgenic tomato plants 133

P. Schopfer: Cytochemical identification or arabinogalactan protein in the outer epidermal wall of maize coleoptiles 139

Number 2

In memoriam E. Bünning 149

M.-H. Avelange, J.M. Thiéry, F. Sarrey, P. Gans, F. Rébeillé: Mass-spectrometric determination of O_2 and CO_2 gas exchange in illuminated higher-plant cells. Evidence for light-inhibition of substrate decarboxylations 150

M.-H. Avelange, F. Rébeillé: Mass spectrometric determination of O_2 gas exchange during a dark-to-light transition in higher-plant cells. Evidence for two individual O_2-uptake components 158

G. Kogel, B. Beissmann, H.J. Reisener, K. Kogel: Specific binding of a hypersensitive lignification elicitor from *Puccinia graminis* f. sp. *tritici* to the plasma membrane from wheat (*Triticum aestivum* L.) 164

T.J.M. Blom, M. Sierra, T.B. van Vliet, M.E.I. Franke-van Dijk, P. de Koning, F. van Iren, R. Verpoorte, K.R. Libbenga: Uptake and accumulation of ajmalicine into isolated vacuoles of cultured cells of *Catharanthus roseus* (L.) G. Don. and its conversion into serpentine 170

G. Cornic, J.-M. Briantais: Partitioning of photosynthetic electron flow between CO_2 and O_2 reduction in a C_3 leaf (*Phaseolus vulgaris* L.) at different CO_2 concentrations and during drought stress 178

R.J. Robins, A.J. Parr, E.G. Bent, M.J.C. Rhodes: Studies on the biosynthesis of tropane alkaloids in *Datura stramonium* L. transformed root cultures. 1. The kinetics of alkaloid production and the influence of feeding intermediate metabolites 185

R.J. Robins, A.J. Parr, N.J. Walton: Studies on the biosynthesis of tropane alkaloids in *Datura stramonium* L. transformed root cultures. 2. On the relative contributions of L-arginine and L-ornithine to the formation of the tropane ring 196

R. Viola, H.V. Davies, A.R. Chudeck: Pathways of starch and sucrose biosynthesis in developing tubers of potato (*Solanum tuberosum* L.) and seeds of faba bean (*Vicia faba* L.). Elucidation by ^{13}C-nuclear-magnetic resonances spectroscopy 202

I.O. Sanders, A.R. Smith, M.A. Hall: Ethylene binding in epicotyls of *Pisum sativum* L. cv. Alaska 209

M. Furuya, N. Ito, K. Tomizawa, E. Schäfer: A stable phytochrome pool regulates the expression of the phytochrome I gene in pea seedlings 218

R.A.J. Hodgson, J.K. Raison: Superoxide production by thylakoids during chilling and its implication in the susceptibility of plants to chilling-induced photoinhibition 222

N.E.J. Appleford, J.R. Lenton: Gibberellins and leaf expansion in near-isogenic wheat lines containing *Rht1* and *Rht3* dwarfing alleles 229

A.D. Parry, A.D. Blonstein, M.J. Babiano, P.J. King, R. Horgan: Abscisic-acid metabolism in a wilty mutant of *Nicotiana plumbaginifolia* 237

A.D. Blonstein, A.D. Parry, R. Horgan, P.J. King: A cytokinin-resistant mutant of *Nicotiana plumbaginifolia* is wilty 244

J. Köhler, E. Fritz, G. Orlich, E. Komor: Microautoradiographic studies of the role of mesophyll and bundle tissues of the *Ricinus* cotyledon in sucrose uptake 251

J. Van Parijs, W.F. Broekaert, I.J. Goldstein, W.J. Peumans: Hevein: an antifungal protein from rubber-tree (*Hevea brasiliensis* latex 258

E. Hofmann, R. Grimm, K. Harter, V. Speth, E. Schäfer: Partial purification of sequestered particles of phytochrome from oat (*Avena sativa* L.) seedlings 265

R. Hooley, M.H. Beale, S.J. Smith: Gibberellin perception at the plasma membrane of *Avena fatua* aleurone protoplasts 274

R.H. Goddard, J.W. La Claire II: Calmodulin and wound healing in the coenocytic green alga *Ernodesmis verticillata* (Kützing) Børgesen. Immunofluorescence and effects of antagonists 281

M. Kwiatkowska: Autoradiographic studies on the role of plasmodesmata in the transport of gibberellin 294

S.J. Crafts-Brandner, M.E. Salvucci, D.B. Egli: Fruit removal in soybean induces the formation of an insoluble form of ribulose-1,5-bisphosphate carboxylase/oxygenase in leaf extracts 300

Liswidowati, F. Melchior, F. Hohmann, B. Schwer, H. Kindl: Induction of stilbene synthase by *Botrytis cinerea* in cultured grapevine cells 307

Number 3

N.Yu. Abramycheva, A.V. Babakov, S.V. Bilushi, E.E. Danilina, V.P. Shevchenko: Comparison of the biological activity of fusicoccin in higher plants with its binding to plasma membranes 315

A. Hensel, D.A. Brummell, R. Hanna, G. Maclachlan: Auxin-dependent breakdown of xyloglucan in cotyledons of germinating nasturtium seeds 321

K.A. Marrs, L.S. Kaufman: Rapid transcriptional regulation of the *Cab* and pEA207 gene families in peas by blue light in the absence of cytoplasmic protein synthesis 327

J. Thielmann, P. Galland, H. Senger: Action spectra for photosynthetic adaptation in *Scenedesmus obliquus*. I. Chlorophyll biosynthesis under autotrophic conditions 334

J. Thielmann, P. Galland: Action spectra for photosynthetic adaptation in *Scenedesmus obliquus*. II. Chlorophyll biosynthesis and cell growth under heterotrophic conditions 340

A. van der Werf, D. Raaimakers, P. Poot, H. Lambers: Evidence for a significant contribution by peroxidase-mediated O_2 uptake to root respiration of *Brachypodium pinnatum* 347

K. Ichihara: The action of phosphatidate phosphatase on the fatty-acid composition of safflower triacylglycerol and spinach glycerolipids 353

R.B. Lee, R.G. Ratcliffe: Observations on the subcellular distribution of the ammonium ion in maize root tissue using in-vivo ^{14}N-nuclear magnetic resonance spectroscopy 359

A. Goldsworthy, M.G. Mina: Electrical patterns of tobacco cells in media containing indole-3-acetic acid or 2,4-dichlorophenoxyacetic acid. Their relation to organogenesis and herbicide action 368

M.W. Elmlinger, H. Mohr: Coaction of blue/ultraviolet-A light and light absorbed by phytochrome in controlling the appearance of ferredoxin-dependent glutamate synthase in the Scots pine (*Pinus sylvestris* L.) seedling 374

H. Ishikawa, K.H. Hasenstein, M.L. Evans: Computer-based video digitizer analysis of surface extension in maize roots. Kinetics of growth rate changes during gravitropism 381

T. Murata, M. Wada: Effects of centrifugation on preprophase-band formation in *Adiantum* protonemata 391

A.J. Mackie, A.M. Roberts, J.A. Callow, J.R. Green: Molecular differentiation in pea powdery-mildew haustoria. Identification of a 62-KDa N-linked glycoprotein unique to the haustorial plasma membrane 399

H.-J. Peter, C. Krüger-Alef, W. Knogge, K. Brinkmann, G. Weissenböck: Diurnal periodicity of chalcone-synthase activity during the development of oat primary leaves 409

B. Ehmann, B. Ocker, E. Schäfer: Development- and light-dependent regulation of the expression of two different chalcone synthase transcripts in mustard cotyledons 416

R. Bassi, F.-A. Wollman: The chlorophyll-a/b proteins of photosystem II in *Chlamydomonas reinhardtii*. Isolation, characterization and immunological cross-reactivity to higher-plant polypeptides 423

H. Depta, S.E.H. Holstein, D.G. Robinson, M. Lützelschwab, W. Michalke: Membranes markers in highly purified clathrin-coated vesicles from *Cucurbita* hypocotyls 434

R.D. Slocum, M.J. Furey III: Electronmicroscopic cytochemical localization of diamine and polyamine oxidases in pea and maize tissues 443

D.L. Willey, K. Fischer, E. Wachter, T.A. Link, U.-I. Flügge: Molecular cloning and structural analysis of the phosphate translocator from pea chloroplasts and its comparison to the spinach phosphate translocator 451

K. Baba, M. Ogawa, A. Nagano, H. Kuroda, K. Sumiya: Developmental changes in the bark lectin of *Sophora japonica* L. 462

Number 4

P.J. Meakin, J.A. Gatehouse: Interaction of seed nuclear proteins with transcriptionally-enhancing regions of the pea (*Pisum sativum* L.) *legA* gene promoter 471

I. Winicov, J.D. Button: Accumulation of photosynthesis gene transcripts in response to sodium chloride by salt-tolerant alfalfa cells 478

K. Kováts, A. Binder, H.R. Hohl: Cytology of induced systemic resistance of cucumber to *Colletotrichum lagenarium* 484

K. Kováts, A. Binder, H.R. Hohl: Cytology of induced systemic resistance of tomato to *Phytophthora* infestans 491

J.L. Araus, H.R. Brown, G.T. Byrd, M.D. Serret: Comparative effects of growth irradiance on photosynthesis and leaf anatomy of *Flaveria brownii* (C_4-like), *Flaveria linearis* (C_3-C_4) and their F_1 hybrid 497

T. Endo, N. Hamaguchi, T. Eriksson, Y. Yamada: Alkaloid biosynthesis in somatic hybrids of *Duboisia leichhardtii* F. Muell. and *Nicotiana tabacum* L. 505

H.S. Heide-Jørgensen: Cuticle development and ultrastructure: evidence for a procuticle of high osmium affinity 511

P. Stabel, A. Sundås, P. Engström: Cytokinin treatment of embryos inhibits the synthesis of chloroplast proteins in Norway spruce 520

M.E. Spencer, R. Hodge: Cloning and sequencing of the cDNA encoding the major albumin of *Theobroma cacao*. Identification of the protein as a member of the Kunitz protease inhibitor family 528

R.J. Aerts, A. de Waal, E.J.M. Pennings, R. Verpoorte: The distribution of strictosidine-synthase activity and alkaloids in *Cinchona* plants 536

W.P. Quick, U. Schurr, R. Scheibe, E.-D. Schulze, S.R. Rodermel, L. Bogorad, M. Stitt: Decreased ribulose-1,5-bisphosphate carboxylase-oxygenase in transgenic tobacco transformed with "antisense" *rbcS*. I. Impact on photosynthesis in ambient growth conditions 542

M. Stitt, W.P. Quick, U. Schurr, E.-D. Schulze, S.R. Rodermel, L. Bogorad: Decreased ribulose-1,5-bisphosphate carboxylase-oxygenase in transgenic tobacco transformed with "antisense" *rbcS*. II. Flux-control coefficients for photosynthesis in varying light, CO_2, and air humidity 555

H. Laasch, J. Schumann, G. Günther: Inhibition of the transthylakoid gradient of electrochemical proton potential by the local anesthetic dibucaine 567

M. Becana, M.L. Salin, L. Ji, R.V. Klucas: Flavin-mediated reduction of ferric leghemoglobin from soybean nodules 575

J.H. Slone, T.J. Buckhout: Sucrose-dependent H^+ transport in plasma-membrane vesicles isolated from sugarbeet leaves (*Beta vulgaris* L.). Evidence in support of the H^+-symport model for sucrose transport 584

A. Schwartz, N. Illan, S.M. Assmann: Vanadate inhibition of stomatal opening in epidermal peels of *Commelina communis*. Cl^- interferes with vanadate uptake 590

Z. Chen, R.J. Spreitzer: Proteolysis and transition-state-analogue binding of mutant forms of ribulose-1,5-bisphosphate carboxylase/oxygenase from *Chlamydomonas reinhardtii* 597

A.C. Allan, P.H. Rubery: Calcium deficiency and auxin transport in *Cucurbita pepo* L. seedlings 604

J.K.E. Ortega, M.E. Smith, A.J. Erazo, M.A. Espinosa, S.A. Bell, E.G. Zehr: A comparison of cell-wall-yielding properties for two developmental stages of *Phycomyces* sporangiophores. Determination by in-vivo creep experiments 613

A. Battistelli, M.D. Adcock, R.C. Leegood: The relationship between the activation state of sucrose-phosphate synthase and the rate of CO_2 assimilation in spinach leaves 620
